

Calculating BMI(Rachel Batra)

```
--> W : read ( "Enter your weight" ) $
```

```
//Enteryourweight////////50;
```

```
--> H : read ( "Enter your height in feet and inches" ) $
```

```
//Enteryourheightinfeetandinches////////5.5;
```

```
--> H1 : print ( "Height in metres" ,  $5.5 \cdot 0.305$  ) $
```

```
//Heightinmetres////////1.6775////
```

```
--> print ( "Your BMI is:" ,  $W / (H1)^2$  ) $
```

```
//YourBMIis :////////17.76826188641195////
```
